The main street in Tutzing is currently under construction. This may cause delays in arrival and departure. Bus and taxi services between the Academy and the train station are also affected. Please consider this when planning your trip.

Tutzing is located approximately 35 km southwest of Munich on Lake Starnberg (Starnberger See).

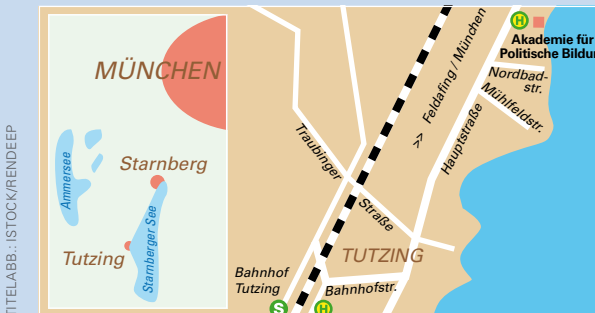

From Munich Central Station (Hauptbahnhof): Take the urban railway S-6 (S-Bahn) or the regional train (RB) to Tutzing. At the train station in Tutzing, take the Bus 958/978 to „Klenzestraße“. You will also find cabs at the front entrance of Tutzing train station. Please note our special offers for conference tickets through the Deutsche Bahn (DB) found on our Website, see contact ["how to find us"](#).

From the airport take the urban railway S-1 or S-8 to Munich Central Station and follow the instructions above.

You can also reach the Academy by foot from Tutzing train station. It takes you 20 to 30 minutes.

To reach the Academy by car, take freeway A95 from Munich via A952 to Starnberg and continue on the federal highway until you pass the town of Traubing, then take a left. At the end of the road turn right to Tutzing. The Academy is on your left shortly after passing the town sign Tutzing.

Our guests are invited to use the charging points of the Academy for E-vehicles (cars, scooters, bikes) free of charge.

**April 10 – 12, 2024**

In cooperation with  
DVPW – Deutsche Vereinigung  
für Politikwissenschaften

INVITATION

This „DVPW-Thementagung“ brings together researchers from global environmental politics and sustainability studies, International Political Economy, and International Relations to discuss the role of the concept of planetary boundaries in (the study of) global politics. We aim to advance the integration of so far rather dispersed insights in these fields in order to shed light on a range of practices of global environmental and sustainability governance in specific transnational sites and broader political contexts. We draw attention to how the governance of planetary boundaries is shaped by and shapes key international norms, the interplay of various state and nonstate actors, and the setup of the global political economy at large. This engagement will help to clarify how the concept figures in global environmental governance, interstate relations, specific domains of the global political economy and certain fields of study themselves.
